## **Green Fuels America becomes a Stakeholder in the Eastern Sierra Region Clean Cities Coalition**

SPARKS, NV – Green Fuels America, Inc. of Sparks, Nevada has joined as a Stakeholder in the Eastern Sierra Region Clean Cities Coalition. Together with our parent, Green Fuels Limited of the UK, we are one of the world’s leading biodiesel equipment manufacturers. Green Fuels sells two distinctly different lines of biodiesel processors.

The first product line is “Personal Scale” biodiesel processors designed for individuals (home use), schools, and small businesses. The products include the FuelMeister (#1 worldwide with 5000 machines sold) and the advanced Fuel Pod (air pump driven and includes “dry wash” technology). These products can be seen on [www.myfuelpod.com](http://www.myfuelpod.com). For these products we have a network of about 20 Dealers located around the country who do workshops on personal scale biodiesel production.

Our second line is “Commercial” biodiesel processors with capacities ranging from 500 up to 12,500 gallons of biodiesel per day. These products are aimed at fleet owners, grease collectors, seed crushers, fuel blenders, and government agencies who want to use biodiesel to reduce their carbon footprint, improve vehicle performance, or reduce health risks from petroleum diesel. These processors such as our hallmark FuelMatic can be seen on [www.greenfuelsamerica.com](http://www.greenfuelsamerica.com).

“Compared to petroleum diesel, biodiesel (B100) made with waste vegetable oil in our processors saves a net 21.7 pounds of CO2 emission per gallon”, says Greg Springer, VP & GM of Green Fuels America. “Our mission is to promote use of biodiesel, and help individuals, fleet owners, and local governments obtain safe and economical equipment to make use of this environmentally friendly alternative fuel.”

### **About Clean Cities**

Clean Cities strives to advance the nation's economic, environmental, and energy security by supporting local decisions to adopt practices that contribute to the reduction of petroleum consumption. Clean Cities has a network of approximately 90 volunteer coalitions, which develop public/private partnerships to promote alternative fuels and advanced vehicles, fuel blends, fuel economy, hybrid vehicles, and idle reduction.

Clean Cities is part of the Office of Energy Efficiency and Renewable Energy's [Vehicle Technologies](#) Program under the US Department of Energy.

Beyond the Fuelpod's unique product benefits, users can also be assured that the product will consistently produce a high-quality biodiesel fuel thanks to Fuelpod's national technical support team. The system, which retails for approximately \$4,995, comes complete with all of the chemical testing equipment, scales and safety equipment needed, waterless purifier, oil pre-heater, fueling station, as well as a detailed operator's manual and DVD that lead customers, step-by-step, through the process. Additionally, Fuelpod offers a toll-free support line (866-996-6130).

For more information on the benefits of biodiesel fuel, or to locate a Fuelpod dealer nearest you, visit [www.myfuelpod.com](http://www.myfuelpod.com) or call (775) 336-6193.
